

FOLDER SYNCHRONIZATIONABSTRACT OF THE DISCLOSURE

A method is provided for synchronizing folders between a mobile device and a second computing device. The
5 method includes initiating a folder synchronization request between the mobile device and the second computing device and comparing the folder hierarchy of the mobile device with the folder hierarchy of the second computing device to ascertain differences. Information is sent to at least one
10 of the mobile device and the second computing device as a function of the ascertained differences between the folder hierarchies. The mobile device or second computing device uses the information to modify its folder hierarchy.
